Geek Week: Innovation Through AI/ML

Google Cloud

Matthew O'Connor

Brand Contributor | Google Cloud

Google Cloud: AI Adoption

AI Adoption is a steep wave to ride

Google projects containing ML Models

Used across products:

Google Cloud: AI Adoption

Google Cloud: AI Use Cases

Seeing

Deep Learning has become a better driver than humans by literally going from pixels to steering, throttle, distance, and more.

Hearing

Deep Learning now powers real time audio speech translation for the top languages, allowing more humans to connect than before.

Speaking

Deep Learning now generates realistic human speech, much how we evolved as mammals.

Reading

Deep Learning can analyze 51 different file formats, condensing information to tensors for search, labeling and summarizing.

Google Cloud: AI Products

AI building blocks

Easily infuse AI into applications with custom or pre-trained models.

AutoML

Custom machine learning model training and development.

Vision AI

Custom and pre-trained models to detect emotion, text, more.

Video AI

Video classification and recognition using machine learning.

Cloud Natural Language

Sentiment analysis and classification of unstructured text.

Cloud Translation

Language detection, translation, and glossary support.

Media Translation (beta)

Add dynamic audio translation directly to your content and applications.

Text-to-Speech

Speech synthesis in 220+ voices and 40+ languages.

Speech-to-Text

Speech recognition and transcription supporting 125 languages.

Dialogflow

Conversation applications and systems development suite for virtual agents.

AutoML Tables (beta)

Service for training ML models with structured data.

Cloud Inference API (alpha)

Quickly run large-scale correlations over typed time-series datasets.
